

Choorams

Choorams are fine powder of compound drugs or single drug. The medicinal ingredients are carefully selected, washed, dried and powdered. The machineries used has automatic water cooling system and other facilities like cloth balloons to prevent the loss of aromatic volatile compounds and finest powder. Ingredients like sugar, sugar candy, salts etc are mixed after the processing of the drugs as per the formulations. The powdered and mixed ckoornams are allowed to pass through the seive for uniform particle size. The powder is immediately packed in the covers and put in air tight containers. The product has the colour, odour and taste of ingredients used.
